SECURITY CAMERA FOOTAGE REVIEW REPORT

Case No.: PBPD-2026-034532 | Document No.: 09

Reporting Detective: Det. Patrick Soileau, Badge #2098 — Digital Forensics

Date of Report: October 5, 2025

Source Device: Hikvision DS-2CD2T47G2-L (4MP ColorVu, fixed-lens 2.8mm), serial HK-22887-1144

Source Location: Rear exterior wall, 712 Bourbon Street (The Rusty Anchor), mounted approx. 14 ft above grade, south-facing

Acquisition Method: Live forensic copy via DVR USB export, hashed (SHA-256) on 10/04/2025 at 11:22 AM

Source Authority: Owner consent (P. Olivier) + Search Warrant SW-2025-1141, signed Magistrate Guidry 09:02 AM

Footage Period Reviewed: October 4, 2025 — 01:00:00 to 03:00:00 AM (2 hours)

Working Copy Hash: SHA-256: 0e4f2c7d...b819 (see Exhibit DF-01-hash.txt)

I. CAMERA FIELD OF VIEW

The camera is mounted on the rear exterior wall of The Rusty Anchor, slightly east of the staff door, angled south and approximately 10° east of true south. Field of view captures (a) the staff door directly below and slightly to the camera's left, (b) approximately 18 feet of alley to the south of the door, (c) the opposite (south) alley wall, and (d) intermittent visibility further south due to lighting. Time of day and the non-functional south light limit detail beyond 14 feet from the door. Color rendering is acceptable in the immediate area of the staff door under the operational north light's reach.

II. SUMMARY OF RELEVANT EVENTS

Timestamp	Observation
02:24:51	Staff door opens from inside. Subject A (Black male, white t-shirt, blue jeans, white shoes) steps out, pauses briefly, looks down
02:25:14	Subject A pockets phone, proceeds south down alley, exits frame at south extent (estimated 18 ft from door).
02:26:39	Staff door opens. Subject B (white male, red short-sleeve shirt) exits, holding elongated dark object in right hand (consistent with
02:26:45	Subjects B, C, D pass directly beneath camera and proceed south. Subject B's elongated object is visible against his right thigh.
02:26:58	All three subjects have exited frame at south extent. No additional camera angles capture further movement at this time.
02:27:20	Audio captures: distant raised male voice (unintelligible). Audio gain enhancement performed; see Section IV.
02:27:34	Audio captures: sharp impact sound. Second impact sound at 02:27:36. Third at 02:27:39.
02:27:42	Audio captures: raised male voice — words 'enough' and 'Trent' identifiable per Section IV analysis.
02:28:11	Audio captures: further impact sound, weaker. No additional vocalizations.
02:28:40	Audio quiet.
02:30:48	Three figures (matching Subjects B, C, D by clothing) re-enter frame from the south, running north toward Bourbon Street mouth
02:30:51	Subjects exit frame at north (mouth of alley toward Bourbon).
02:33:17	Single female figure (estimated 5'2"–5'5", dark hair) enters frame from south. Walks slowly, stops, raises phone (consistent with
02:35:06	Female figure proceeds north toward Bourbon and exits frame.
02:39:48	End of relevant continuous segment. Officer Beaulieu's marked unit observed entering alley at 02:47:11.

III. VISUAL ANALYSIS — KEY FRAMES

Frame extraction was performed at the working-copy level using FFmpeg with lossless PNG output. Forty-six (46) key frames were extracted and tagged. Of those, the following are of primary investigative value:

- **KF-09** (02:26:42): Subject B's right hand visible at hip, holding object. Color profile of object: dark brown to black;

length estimated 28 inches based on subject's measured arm reference. Surface texture consistent with smooth wood.

- **KF-14** (02:26:47): Subject D's face captured in 3/4 profile beneath camera. Facial features adequate for photo lineup use. Subject D is identified in this report as MATCHING the booking photo of TRENT CORMIER following Det. Landry's photo array session on 10/08/2025 (see Doc 17).

- **KF-22** (02:30:49): Subject B's right hand returning north, no object visible. Right shirtsleeve appears to have dark staining at cuff (consistent with biological transfer; confirmed by later DNA on recovered shirt — see Doc 10).

IV. AUDIO ENHANCEMENT

Audio was extracted to 48 kHz / 24-bit WAV and processed in iZotope RX 11 with spectral de-noise (light), de-reverb (medium), and band-pass filtering centered on the speech range. Enhancement was non-destructive; original and enhanced files are both retained.

Identifiable utterances in the enhanced audio (02:27:20–02:28:11):

- Male voice (low-pitched), distant: "...trying to record us..." (low confidence)
- Male voice (higher-pitched), distant: "Trent, enough — that's enough!" (medium-high confidence)
- Possible single word: "phone" (low confidence)

Forensic audio enhancement is a developing field. The above transcriptions are offered as investigative leads, not as definitive evidence. Independent expert review by an external forensic audio examiner has been requested through the DA's office.

V. INTEGRITY AND CHAIN OF CUSTODY

The original DVR remains in PBPD evidence storage (Property #PR-2026-034532-D). The forensic copy hash was verified prior to and following each analysis session; no modification to the master file occurred. All working files are version-tracked on the Digital Forensics Unit case server. Chain of custody documentation is maintained as Exhibit DF-COC-001.

Reporting Detective Signature: _____ Det. J. Soileau #2098

Supervisor Review: Sgt. Hannah Tregre, Digital Forensics — 10/05/2025

Report Filed: October 5, 2025 — 4:18 PM
