AUTOPSY REPORT

Case No.: PBDP-2025-088142 | Document No.: 19

ORLEANS PARISH OFFICE OF THE MEDICAL EXAMINER

2018 Earhart Boulevard, New Orleans, LA 70113 | (504) 565-8300

Case Number:	OPME-2025-04471 / PBDP-2025-088142
Decedent:	MARCUS DESHAWN WEBB
Race/Sex:	Black Male
Date of Birth:	March 14, 1991
Age:	34 years
Date of Autopsy:	October 5, 2025
Time of Autopsy:	9:00 AM – 12:45 PM
Location:	Orleans Parish Medical Examiner's Office
Examining Physician:	Dr. Thomas R. Guidry, MD — Chief Medical Examiner, Orleans Parish
Assisting:	Autopsy Technician Latonya James
PBPD Witness:	Det. Renee Broussard, Badge #1887
Cause of Death:	Multiple blunt force injuries to head and torso
Manner of Death:	HOMICIDE
Estimated Time of Death:	Approximately 1:30 AM – 2:15 AM, October 4, 2025

I. EXTERNAL EXAMINATION

The body is that of a well-developed, well-nourished Black male appearing consistent with the stated age of 34 years. Height: 6'1". Weight: 192 lbs. The decedent was received clothed in a white cotton t-shirt (heavily bloodstained), blue denim jeans, white Nike low-top sneakers, and black socks. Clothing was examined and retained as evidence.

Head and Face:

- LACERATION, right temporal region, approximately 3.4 cm in length, with underlying subgaleal hemorrhage and fracture of the right temporal bone. Laceration margins are irregular, consistent with impact against a hard surface or struck with a blunt instrument. Significant blood loss from this wound.
- LACERATION, posterior skull, approximately 2.1 cm, with underlying occipital fracture. Pattern consistent with at least two separate blunt impacts to the posterior cranium.
- CONTUSIONS, bilateral cheekbones. Multiple abrasions on chin consistent with contact with asphalt surface.
- NASAL FRACTURE — comminuted fracture of the nasal bones. Hemorrhagic tissue throughout nasal passages. Consistent with a direct blunt impact.

Torso:

- Multiple contusions across mid and lower back, ranging from 4 cm to 9 cm diameter. The pattern and distribution are CONSISTENT WITH STOMPING or repeated stamping with a shod foot. At least three distinct impression-pattern contusions were identified, suggesting a minimum of three separate stomping impacts.

6. LINEAR IMPRESSION CONTUSIONS: Two parallel linear marks, approximately 1.2 cm wide, spaced approximately 2.8 cm apart, located at the right mid-flank. Consistent with the tread pattern of an athletic shoe outsole.

Upper Extremities:

7. Defensive wounds: abrasions on the dorsum of both forearms, consistent with defensive posturing. Contusion on left palm. These injuries indicate Marcus Webb was conscious and attempting to protect himself during at least part of the assault.

II. INTERNAL EXAMINATION

CRANIAL: Bilateral subdural hematoma (right greater than left). Right temporal bone fracture with epidural hematoma. Left parietal contusion. Diffuse subarachnoid hemorrhage. These injuries are consistent with multiple separate blunt impacts and are consistent with the pattern of being struck and/or having the head contact the ground.

THORAX: Right side: fractures of ribs 5, 6, and 7 at the mid-axillary line. Left side: fractures of ribs 8 and 9. These rib fractures are consistent with both direct striking blows and stomping impacts. No pneumothorax. Pulmonary contusion, right lower lobe.

III. CAUSE AND MANNER OF DEATH

CAUSE OF DEATH: Multiple blunt force injuries to the head and torso, including bilateral subdural hematoma, skull fractures, and bilateral rib fractures.

CONTRIBUTING CAUSE: Blunt force stomping injuries to the torso.

MANNER OF DEATH: HOMICIDE

IV. TIME OF DEATH ESTIMATE

Based on body temperature (84.2°F rectal at 4:30 AM), rigor mortis (developing, not complete), and liver mortis (fixed posteriorly, blanching in upper areas at scene), estimated time of death is between 1:30 AM and 2:15 AM on October 4, 2025. This is consistent with investigative information placing the assault between 1:15 AM and 1:40 AM.
