715 South Broad Avenue, New Orleans, LA 70119
 (504) 658-6080

TOXICOLOGY REPORT

Case No.: PBDP-2025-088142 | Document No.: 20

LOUISIANA STATE POLICE CRIME LAB — TOXICOLOGY SECTION

Case Number: PBDP-2025-088142 / OPME-2025-04471
 Decedent: MARCUS DESHAWN WEBB
 Specimens Received: Femoral blood, vitreous humor, urine, liver tissue
 Date Received: October 5, 2025
 Date of Analysis: October 7, 2025
 Reporting Toxicologist: Dr. Angela Trosclair, PhD — Forensic Toxicologist
 Lab Reference: LSP-TOX-2025-044871

FINDINGS:

Analyte	Specimen	Result	Reference Limit	Interpretation
Ethanol (Alcohol)	Femoral Blood	0.14 g/dL	Legal limit: 0.08	POSITIVE — Intoxicated
Ethanol (Alcohol)	Vitreous Humor	0.16 g/dL	—	Confirms ante-mortem ingestion
Cocaine / Metabolites	Blood/Urine	NOT DETECTED	—	Negative
Cannabinoids (THC)	Blood/Urine	NOT DETECTED	—	Negative
Opiates / Opioids	Blood/Urine	NOT DETECTED	—	Negative
Amphetamines	Blood/Urine	NOT DETECTED	—	Negative
Benzodiazepines	Blood/Urine	NOT DETECTED	—	Negative
Other CNS Depressants	Blood/Urine	NOT DETECTED	—	Negative
Prescription Medications	Blood/Urine	NOT DETECTED	—	Negative

INTERPRETATION:

The decedent had a blood alcohol concentration of 0.14 g/dL at the time of death. This level is consistent with moderate intoxication. At this concentration, an individual of Mr. Webb's size (192 lbs) would be expected to experience impaired coordination and reaction time, but would remain conscious, ambulatory, and capable of defensive actions. The BAC of 0.14 does not indicate incapacitation.

The vitreous humor ethanol level of 0.16 g/dL is slightly higher than the femoral blood level, which is consistent with the normal post-mortem redistribution pattern and confirms that alcohol was consumed before death.

No controlled substances, illicit drugs, or prescription medications were detected. This is not a drug-facilitated assault case. The decedent's impairment was limited to alcohol at a level consistent with voluntary social consumption.
