BLOOD ANALYSIS REPORT

Case No.: PBDP-2025-088142 | Document No.: 23

LOUISIANA STATE POLICE CRIME LAB — SEROLOGY SECTION

Case Number: PBDP-2025-088142
 Submitting Agency: NOPD, submitted by Det. Broussard and CSI Tran
 Date Submitted: October 4, 2025
 Date of Analysis: October 5–6, 2025
 Reporting Analyst: Serologist Damon Pierre, BS — LSP Serology Section

Item #	Description	Blood Present?	Blood Type	Notes
CS-001	Blood swab — primary pool (scene)	YES	A+	High volume; victim's head wound
CS-002	Blood swab — secondary spatter trail	YES	A+	Consistent with victim blood
CS-003	Shoe impression swab (blood)	YES	A+	Impression at victim ribcage
SE-001	Derek Fontenot left sneaker outsole	YES	A+	Not owner's blood (owner is O-)
TB-001	Swab — Travis Bell right knuckle laceration	YES	A+	Victim blood type, not Bell's (Bell O+)
CS-009	Cigarette butts (2)	NO	N/A	No blood detected
CS-010	Beer bottle fragment	NO	N/A	No blood detected

SUMMARY:

All blood identified at the crime scene and on suspect evidence items is BLOOD TYPE A POSITIVE (A+). This is consistent with the victim Marcus Webb's blood type (A+). No blood of any other type was detected at the scene or on any evidence items. The presence of A+ blood on Derek Fontenot's left sneaker and on Travis Bell's right knuckle laceration area is particularly significant, as neither Fontenot (O-) nor Bell (O+) has A+ blood.

NOTE: ABO blood typing is a presumptive serological test. The findings are consistent with victim blood but do not individually identify the source with the same certainty as DNA analysis. DNA analysis has been separately requested for all items (see DNA Analysis Report, Doc 21). Blood typing results are consistent with and supportive of the DNA findings.
